University of Maryland University College  
Business Administration/Cybersecurity  
3.78 GPA

### PROFESSIONAL SNAPSHOT

- Web design & development
- Algorithms, functions, and programmatic logic
- Responsive CSS
- Ability to manipulate HTML, CSS, & Javascript using DOM
- Enterprise IT services
- Business Development & Operations
- Critical Path Method
- Project Management
- Information Technology
- Work Breakdown Structures
- Gantt Charts
- Federal contracts & proposals

### OVERVIEW

My most unique quality is an uncanny knack for mastering dual ends of a spectrum. In my work I deliver keen analytical insight paired with creative flair; I remain approachable yet highly polished, and am comfortable traversing the microcosm of my latest project up through broad strategic initiatives of my company at large. My compulsive intellectual curiosity ensures that each day of work I deliver more than I did the last.

What gratifies me about web design and development is that in this digital age, your online footprint is almost the soul of your company. What you choose to say about your organization speaks to your values and your mission. Making that introduction to a company visually stimulating, navigable, and polished is my passion.

### EXPERIENCE

#### 2016-PRESENT

#### WEB DEVELOPER

##### GENERAL ASSEMBLY

Independent and immersive web design and development, including responsive and visually engaging sites utilizing both frontend and backend web technologies including HTML, CSS, Javascript, Ruby/Rails, jQuery, and others. My strength is an unrelenting drive to master design techniques and programming languages that make for sleek, powerful functionality paired with visually captivating user interfaces. I thrive in programming, where my intense curiosity has an outlet in the plethora of things to learn.

#### 2014-2015

#### TALENT ACQUISITION SPECIALIST

##### BRIC

Staffed multi-million dollar efforts in support of government agencies in Defense & Intel. Consistently in top 97% of metrics for recruiting team, selected often to travel with our organizational partners. Managed the staffing of 20 million dollars worth of new business, frequently helping author proposals & bids, liaise with subcontractors, and assist in other myriad ways with the entire project lifecycle.

#### 2013

#### TALENT CONSULTANT

##### FIRST-TEK

Simultaneously supported staff augmentation for a Fortune 500 staffing company and energy brokerage. Hired for a litany of highly technical disciplines including web development, data science, systems architecture, network engineering & administration, and others.

*Previous Work: Recruiter/Trainer PFS, 2010-2012*
